## 1 INTRODUCTION

**inet** PROMPT the brokers worldwide to automate order routing and management. Inet PROMPT is a complete online trading solution for stock brokers, which incorporates a full fledged order Management system with a built in multi level risk management module, and a powerful real time streaming market data system. **inet** PROMPT can be configured to operate on multiple venues dealing multiple assets, simultaneously, which in turn make brokers day-today operations hassle free.

**inet** PROMPT provides various interfaces through which orders of multiple instrument types can be captured electronically. **inet** PROMPT allows you to define the execution destinations and automatically route orders to them based on routing rule. The system automates trade workflows from the moment on which the orders are generated and until executions are received and trades are generated.

## 2 KEY FEATURES

Inet PROMPT automates order capture, order validation, and order/execution processing, such that a trade goes through its entire life cycle without manual handling or redundant processing. The key features of inet include the following:

- Order Routing And Execution
- Thick and Thin (Web Based Clients)
- Multi OS (Windows, Linux, Solaris)
- Multiple Exchange
- Multiple Protocol
- Multiple Segments
- Conditional Alerts and Market Watches
- Back-Office Interface
- High Security
- Multiple Channel Access
- Scalability And Performance
- System Monitoring And Auditing
- Risk Management
- B2B Interface (Cash And Derivatives)
- Works On hybrid Networks (VSAT, ISDN, Leased Line, PRI)
- Facility to place One Touch Order
- Direct Market Access facility

## 3 SYSTEM OVERVIEW

The Inet PROMPT Integrated system is used to trade on National Stock Exchange (NSE), Bombay Stock Exchange (BSE), NMCE, NCDEX, MCX and Derivatives Exchange for the equities, derivatives, commodities segment. Using one CTCL ID (Computer-To-Computer-Link ID), you can create unlimited users and trades accordingly.

### 3.1 General Layout

An overview of the major elements on the Inet PROMPT window such as the title bar, menu bar, toolbar, index bar, status bar and the message area are introduced to the user in this section. With the help of these elements, you can choose the various aspects for effective trading.

#### MENU BAR

Below the title bar is the menu bar with various menu items. Selecting a command from one of these menus either performs an action or displays a sub-menu. These command items are put together in a menu based on their functionality. This is the main menu of the application.

Logged as Client

File Edit View Work Space Order Market Intelligence Tools Help

Logged as Dealer

File Edit View Work Space Order Manage Funds Market Intelligence Tools Help

#### TOOL BAR

You can use the toolbar for quick access to the most commonly used menu commands. These menu commands are represented by an icon on the toolbar which when clicked executes the respective command. The same includes options to create a new workspace, Save all workspace, Delete Workspace, Ticker, Buy, Sell, Add Symbol, Add Ticker symbol and Change theme.

#### INDEX BAR

The stock exchange index is a relative measure of the performance of all or a number of stocks that are traded on a stock exchange. The online NSE Index of securities can be identified by the up and down arrows. The index value is shown by the change in Font color. When the index value increases the Font color of the index changes to BLUE and when the index value decreases, changes to RED. This is displayed right corner of the menu bar.

↑ S&P CNX NIFTY	4523.25	5.70
↓ BSE SENSEX	15129.79	56.25

#### STATUS BAR

Status Bar displays the current market status of the exchanges and the user ID in which the User logs in. It's been displayed at the bottom of the window.

15-06-2011 23:00:01 [MCX] Please note that the trading system will not accept orders from CTCI Terminals whose details are not uploaded to the Exchange at least 2 days prior to placing such orders / Not  
01:02:40 [Other Messages] MCX EC DISCONNECTED O-OPEN,C-CLOSED,PC-POST CLOSING,PO-PRE OPEN,SD-START OF DAY,ED-END OF DAY,MQ-MEMBER QUERY

#### MESSAGE AREA

Message area is Below the Status bar, which is for displaying messages like announcements made by exchanges and all.

10:18:42 [NSE] The NSE MIBID and MIBOR as at 9:40 hrs. are as under:  
10:19:50 [NSE] CORPORATE ANNOUNCEMENTS

## 4 FILE MENU

File menu is comprised of various options like New Workspace, Delete Workspace, Lock Terminal, Save All Workspace, Import Workspace, Export Workspace, Change Password, Trade Download(For Dealer Terminal), Logout and Exit.

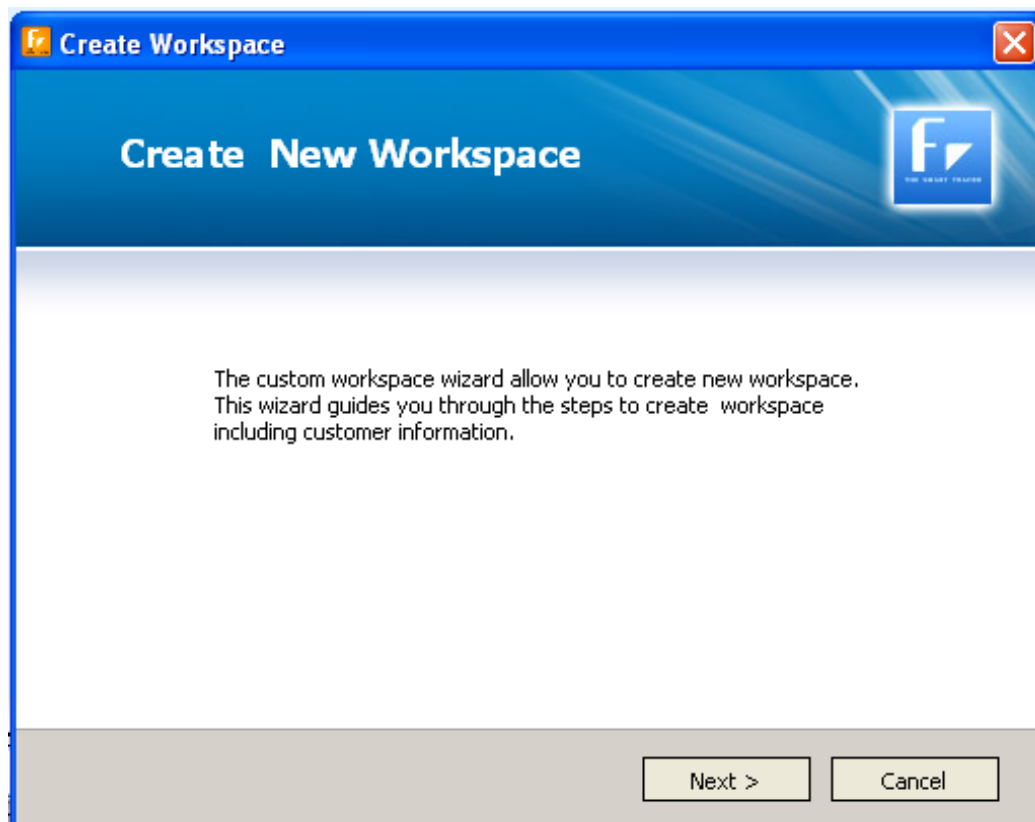

### 4.1 Create New Workspace

File menu enables the user to create new workspace. The option offers personalization of your trading experience by enabling you to add watches and charts, all populated by real time streaming market data to a workspace. There are also predefined workspaces like a professional workspace, which shows a market watch, chart, Indices and exchange announcements in multiple windows. Multiple workspaces populated by multiple windows can be created. Workspaces can be saved and they facilitate familiarity for easy access to data for a quicker response time to market.

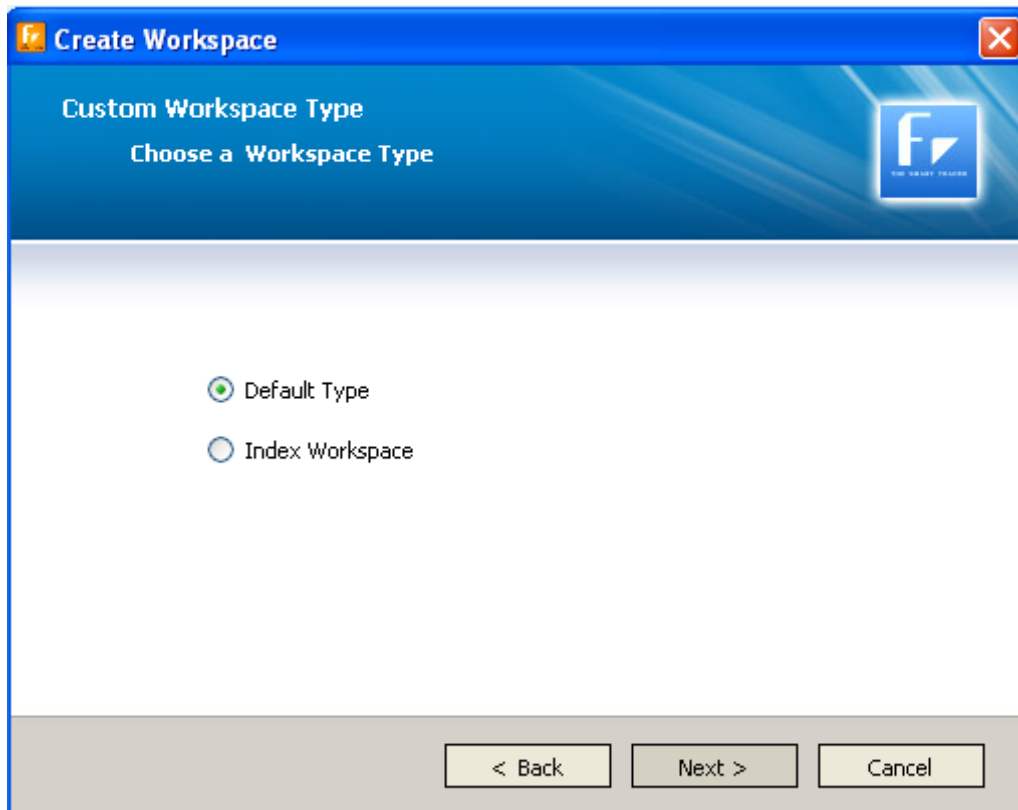

#### CUSTOM WORKSPACE

To create a new workspace either click on the  icon from toolbar or else select create workspace from file menu.

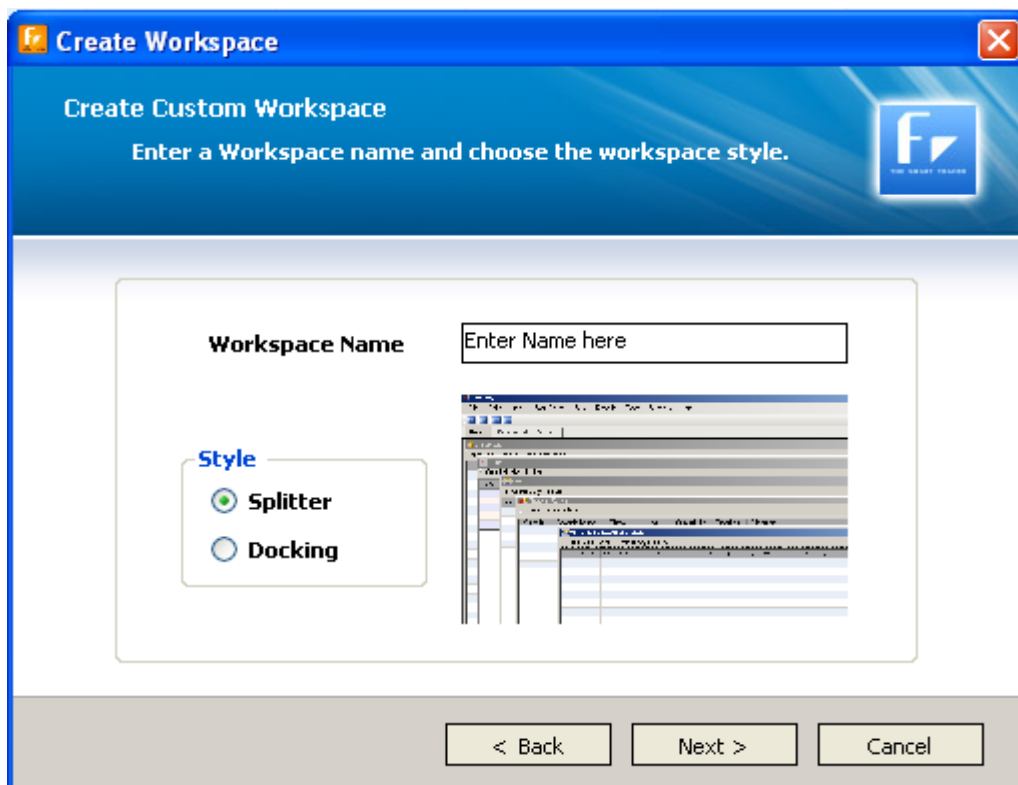

#### Creation of a workspace

Click Next to create a workspace

- Select Default Type. My Portfolio is an enhancement feature for retail investors. It is not currently available and proposes to create a work space based on the investor's holdings. Click Next

Type the workspace name. Select Docking or Splitter for workspace positioning. Click Next.

**Create Workspace**

**Select Components**

You can select components for workspace. Select components from the following list

You must select at least one component for creating workspace

☒ Market Watch ☐ IndexChart

☐ MBP Watch ☐ Graph

☐ Index

< Back Next > Cancel

Select the items that must be displayed in the workspace and click next

**Create Workspace**

**Client Information**

You want to map client order screen with custom workspace ? Enter details here.

☐ Client Mapping

Client Identification

Order Type

☒ LMT ☐ MKT ☐ STL

Product

☒ Cash ☐ Intraday ☐ BTST

< Back Finish Cancel

**Figure 12 : New Workspace5**

- The dealer can map the client details to the workspaces so that order triggered from this workspace will have the client details already filled in. Click Finish to finish creating the work space. Scrips can be added to the created workspace.

**Figure 13 : New Workspace6**

## Creation of Index workspace

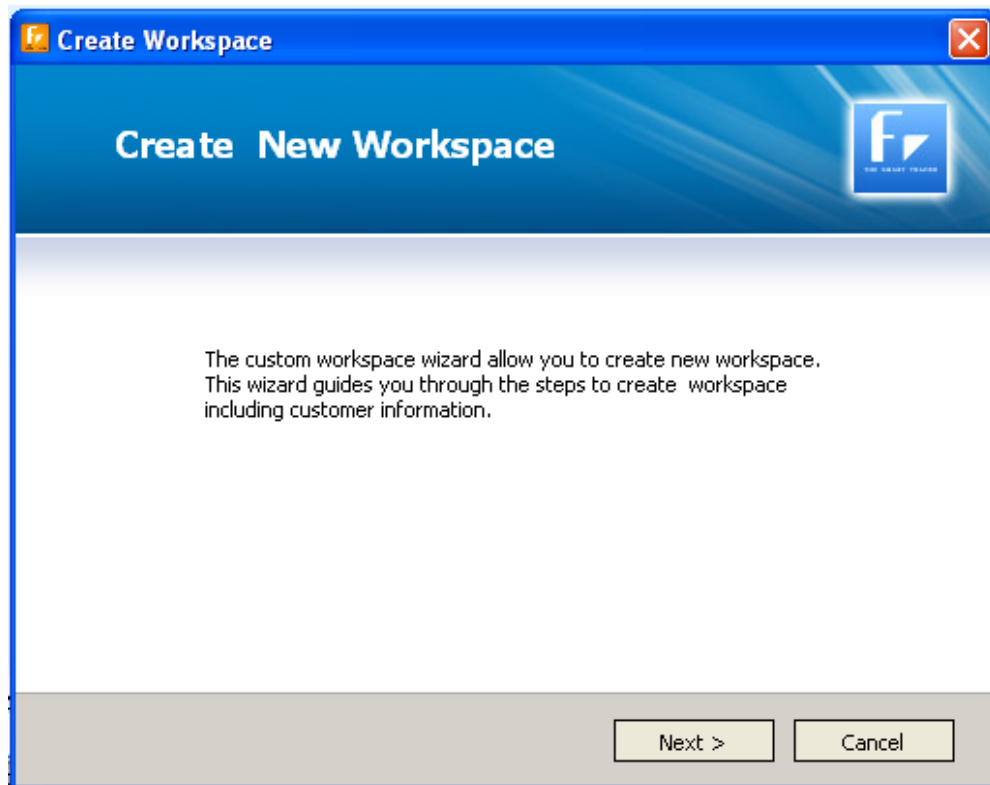

Figure 14 : New Workspace7

- Click on Next to continue creating an Index workspace

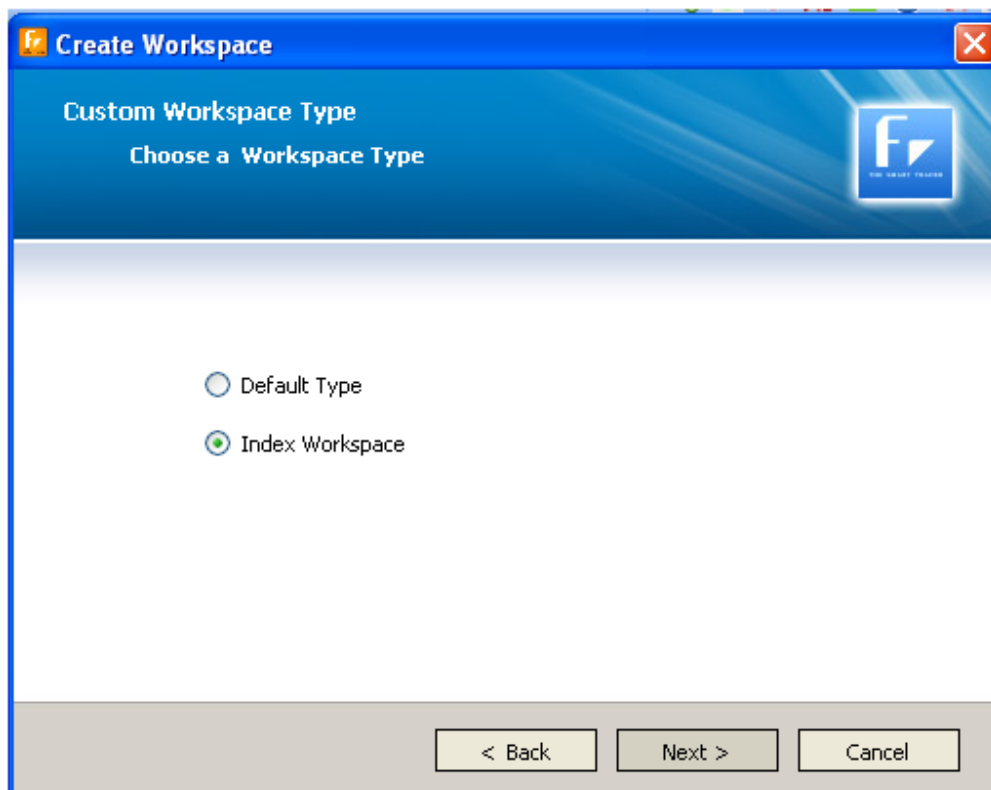

Figure 15 : New Workspace8

- Select Index workspace and then click on next to continue

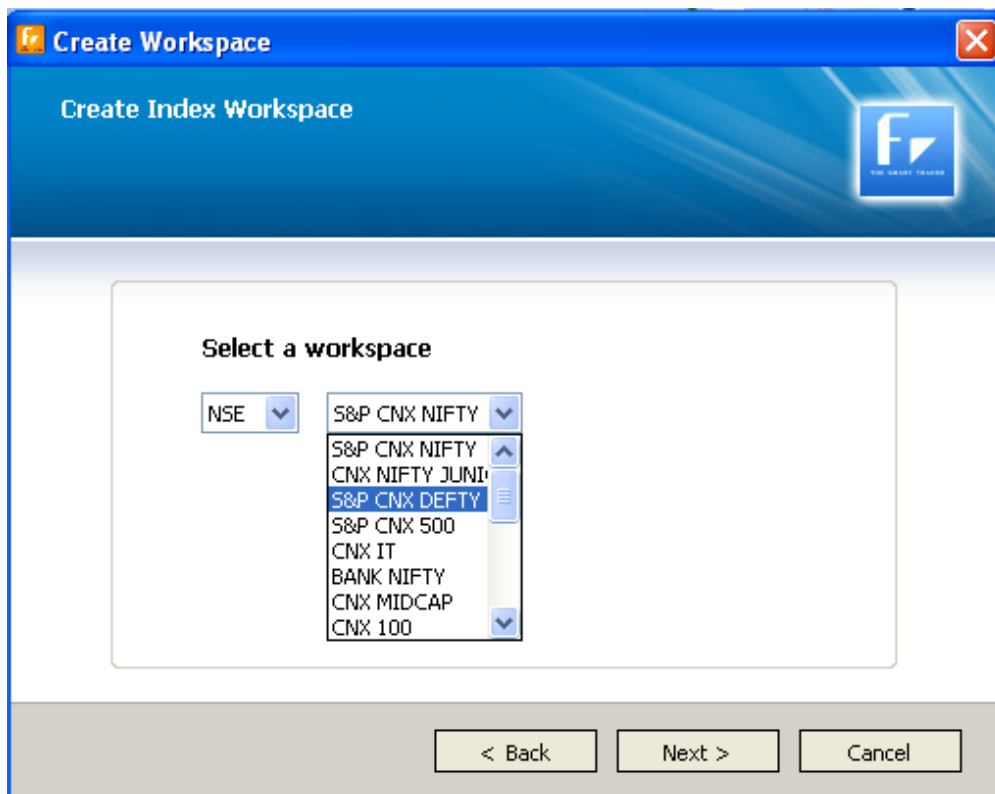

Figure 16 : New Workspace9

- Select the required Exchange and the appropriate Sector and then click on next to continue
- Then select the components required in the Market Watch and then again click on next to continue

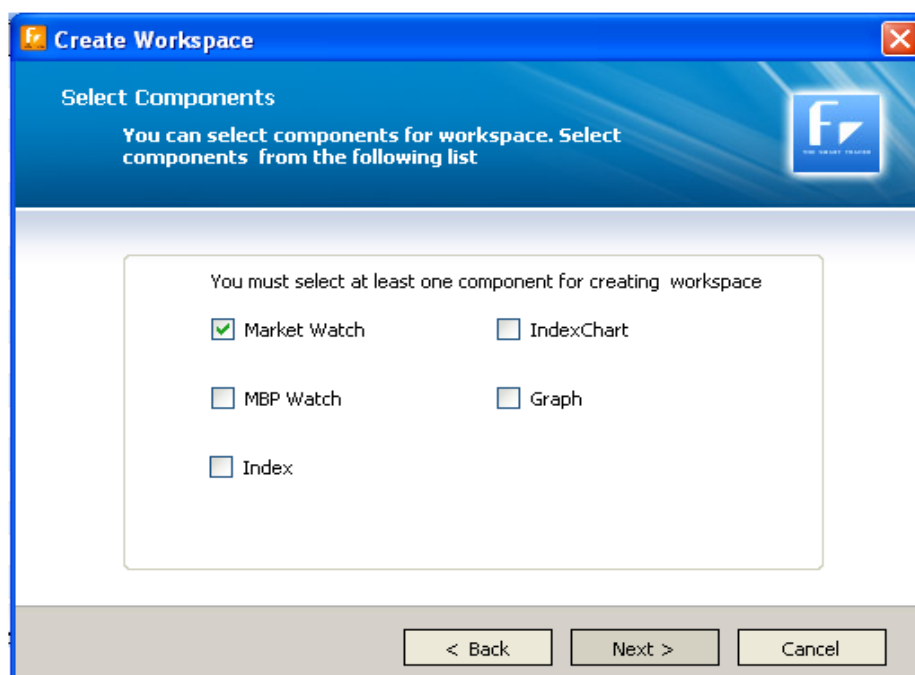

Figure 17 : New Workspace10

**Create Workspace**

**Client Information**

You want to map client order screen with custom workspace ?  
Enter details here.

☐ **Client Mapping**

**Client Identification**

**Order Type**

☒ LMT ☐ MKT ☐ STL

**Product**

☒ Cash ☐ Intraday ☐ BTST

< Back Finish Cancel

Figure 18 : New Workspace11

- The dealer can map the client details to the workspaces so that order triggered from this workspace will have the client details already filled in. Click Finish to finish creating the work space. Scrips can be added to the created workspace.
- After clicking the finish button a new watch will be created and automatically gets populated with the Scrips in that particular sector of the Exchange selected while creating the Watch.

## 4.2 Delete Workspace

File menu enables provision for the user to delete a workspace. From the toolbar click on  button or else select the option "Delete Workspace" from File menu.

Figure 20: Delete Workspace

- For deletion of a particular workspace select the "delete workspace" icon from the file menu.
- By selecting the delete icon a message box will get displayed as follows.

Figure 21 : Delete Confirmation

By clicking on the **Yes** option the workspace will get deleted.

## 4.3 Lock Terminal

User can lock the terminal temporarily by enabling this provision. The option ensures security to the data. User can unlock the terminal by reentering the password in the "Password" field.

1. Go to File Menu
2. Select Lock Terminal

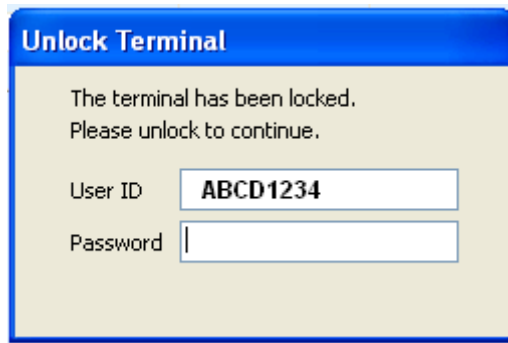

Figure 22 : Unlock Terminal

3. Enter the Password to unlock the terminal

#### 4.4 Save All Workspace

User is offered with the provision to save all workspaces quickly by a single click on the "save all workspace" option in file menu.

1. Go to File Menu
2. Select Save All Workspace
3. Click OK to confirm saving

Figure 23: Save All Workspace

#### 4.5 Import Workspace

User can import workspace from other locations using this import workspace option

1. Go to File Menu
2. Select Import Workspace
3. Select the location from where the file has to be imported.

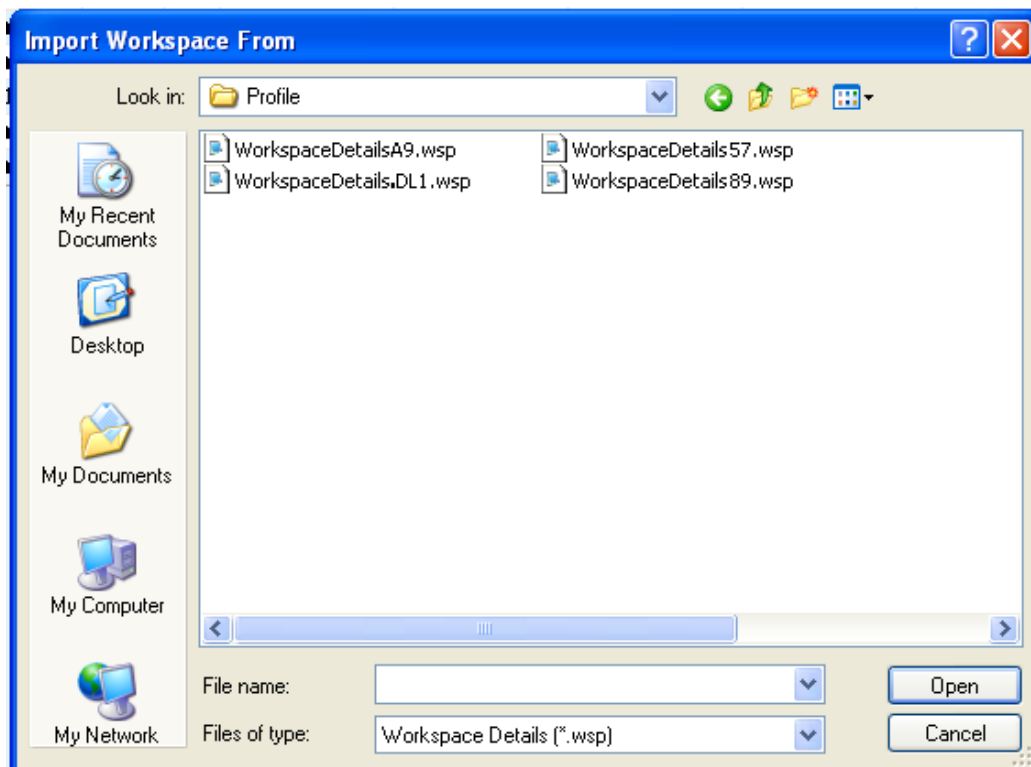

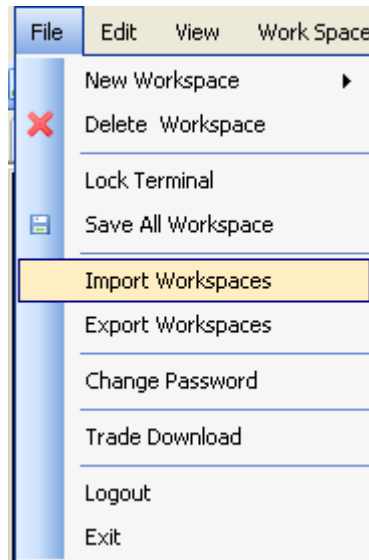

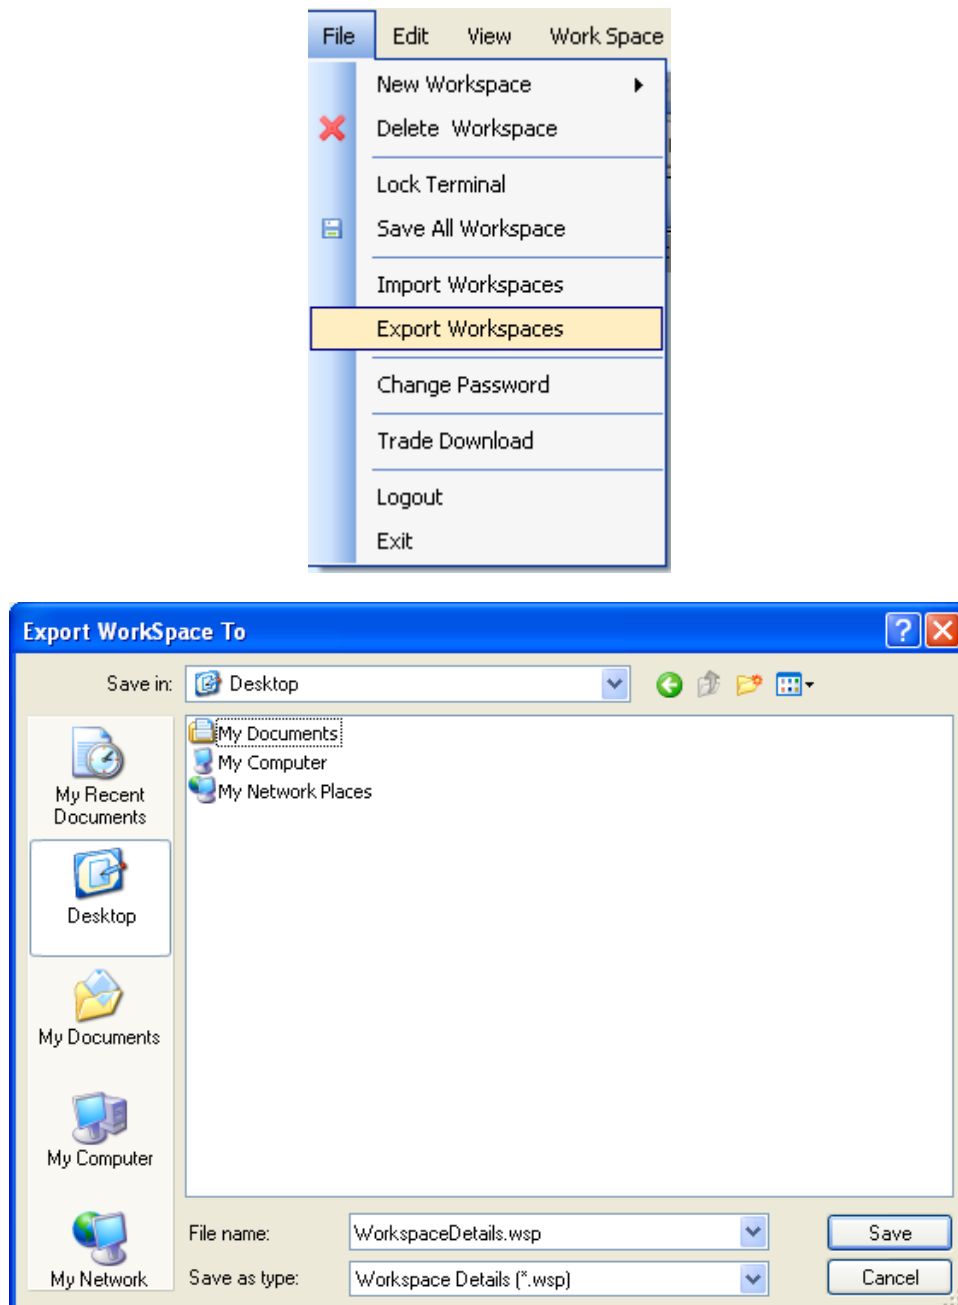

Figure 24: Import Workspace

## 4.6 Export Workspace

User can export workspace to any other location in excel format using export workspace option.

1. Go to File menu
2. Select Export Workspace option
3. Select the location, to where the file has to be exported

**Figure 25: Export Workspace**

## 4.7 Change Password

User could change and reset the password by enabling the option "Change Password" in file menu.

1. Go to File Menu and select the option Change Password
2. Select whether you want to change Login password or Transaction password using the check box available there.
3. Enter data in the fields "Old Password", "New Password" and "Confirm Password"
4. Enter OK button to save the new password and cancel button for not saving the change

- \* Atleast one small letter.

**Figure 26: Change Password**

## 4.8 Trade Download

The option enables the user to download the trades been done on that particular day. The facility can be made available, if the user has logged in from dealer terminal alone.

1. Specify the Exchange name in the corresponding field.

**Trade Download**

Exchange

Download Cancel

**Figure 27: Trade Download**

2. Click on Download button and the Trades will get downloaded as a text file.

## 4.9 Logout

By enabling the Logout option in file menu, User will be logged out from the terminal.

1. Go to File Menu. Select the option Logout. Click "Yes" button to confirm.

**Logout**

Are you sure you want to logout?

Yes No

**Figure 28: Logout**

## 4.10 Exit

User will get exit from the application by enabling the option "Exit" in File menu.

1. Go to File menu. Select the option Exit

Figure 29: Exit

## 5 EDIT MENU

Edit menu facilitates the user to "copy" the workspace and paste it into an excel sheet.

### 5.1 Copy

1. Click on Edit menu and press Copy button. The shortcut key for the same is "Ctrl+C".
2. Open an Excel sheet , paste the content of Market watch in excel by either pressing "Ctrl+V" or by select the "Paste" option available under Edit Menu of the excel sheet

Figure 30: Edit Menu

## 6 VIEW MENU

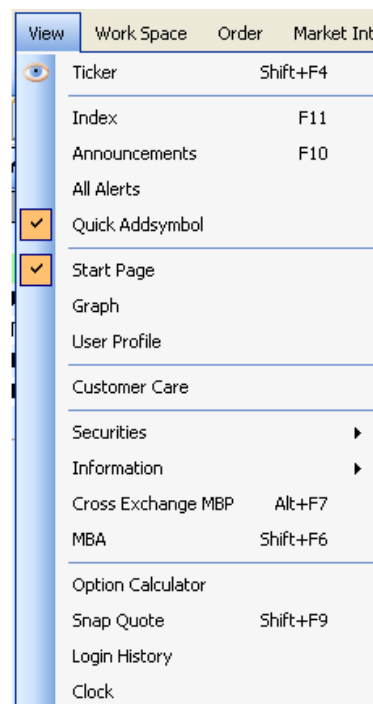

As the name implies view menu is comprised of various options like Ticker, Index, Announcements, All Alerts, Quick Add Symbol, Start Page, Graph, User Profile, Customer Care, Securities, Information, Cross Exchange MBP , MBA [Market By Aggregate] , Option Calculator, Snap quote , Login History and Clock.

### 6.1 Ticker

By default classic workspace displays 300 last traded scrip price at a single page view. In case if the user wish to view some specific Scrips price alone, view menu provides option for the same using "Ticker" function.

#### Steps to be followed

1. Enable the Ticker function by clicking at  symbol in the tool bar or by selecting it from view menu. The short cut key for the same is "Shift+F4".
2. While clicking the ticker symbol, a  (Add Ticker) symbol will get enabled automatically in the tool bar.

- ## How to Add/Delete Ticker symbol

## 6.4 All Alerts

Clients are having provision for setting alerts.

### Steps to be followed:

- Select the option " Set Alert " from the right click menu in Market Watch.
- Alerts are to be based on fields: LT Price, BB Price, BS Price; Condition: Equal To, Greater Than, Less Than; value and date put entry in to these fields.

**Set Alert**

Symbol Name :- GOLDM

☒ Enable Alert      Good till date 16-Jun-2011

Field	Condition	Value
LT Price	equal to	0.00

Save Cancel

Figure 37: Set Alert

- Click save button to save the settings.

On reaching the specified alert settings an alert will be given to the client. Client can view the alert by enabling the view alert option in view menu.

**Alerts**

Choose workspace name Classic View

Symbol	Exchange	Status	Alerts

Figure 38 : All Alerts

## 6.5 Quick Add Symbol

User has the provision to add symbols quickly by "Quick add symbol" option in view menu. By disabling the "Quick Add Symbol" the option for adding symbols quickly will also get disabled.

NSE 20MICRONS 20 MICRONS LTD EQ

Figure 39: Quick Add Symbol

- Select the option Quick add Symbol from the view menu.
- User can quickly add symbols through the marked portion in the screen.

## 6.6 Start Page

By enabling "Start Page" option in view menu, "start page" will be displayed. As default while client enter in to the system the start page will get displayed.

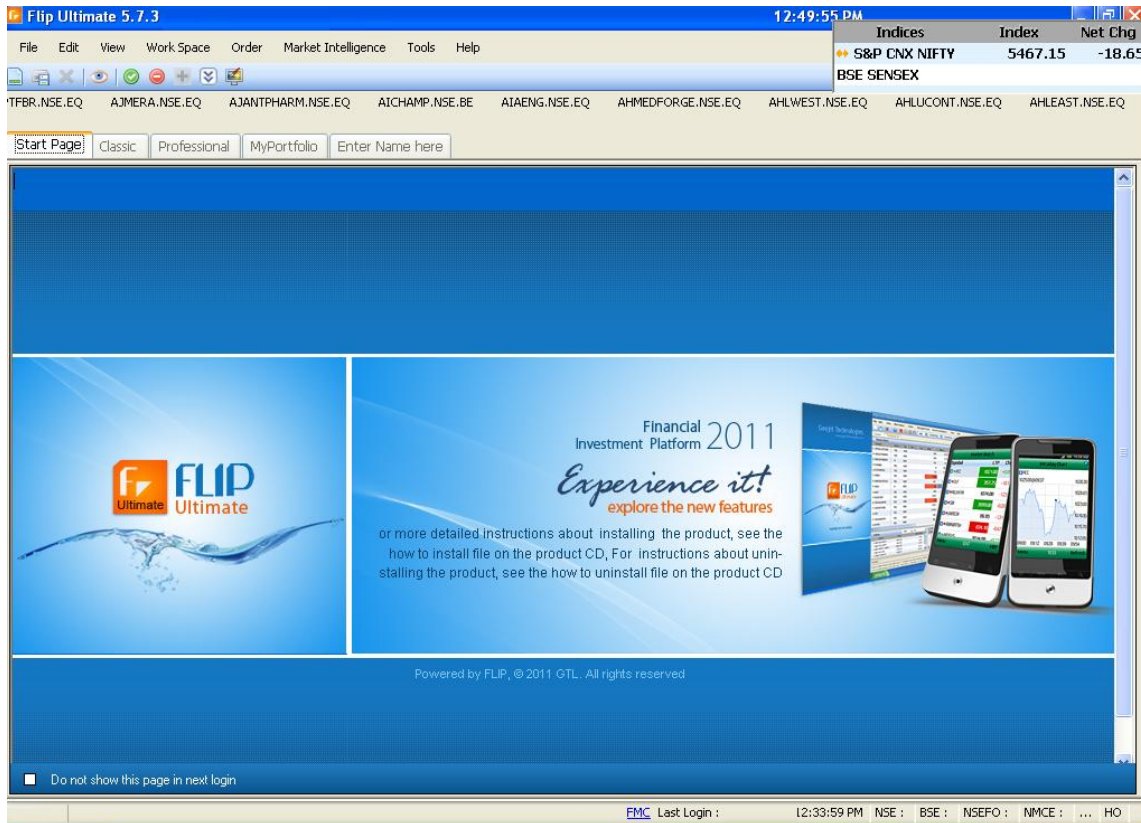

Figure 40: Start Page

## 6.7 Graph

Graphical representation of the market watch can be viewed by the client by enabling the graph option in view menu. Provisions for setting various graphical analysis exist.

Figure 41: Graph

## 6.8 User Profile

User profile enables the user to view details about the user. By selecting "User Profile" from the view menu, it will get enabled.

1. Select the option User profile from the view menu.

The screenshot shows the 'User Profile' window. It contains a form with the following fields:

- ClientID:  ONLINE CLIENT
- Name:
- Address:
- E-mail:  HAKKIM\_MR2005@YAHOO.CO
- Phone:
- Br. Manager:
- Location:
- Br. Address:
- Br. E-mail:
- Phone(Branch):

Below the form is a table with the following columns: ACCOUNTID, VENUECODE, COMPANYCODE, FFM, CRFACTOR, SPANRE.

ACCOUNTID	VENUECODE	COMPANYCODE	FFM	CRFACTOR	SPANRE
00000000	MCX	GFSL	Var.Margin + Add	100.00	Y
00000004	NCDEX	GFSL	Var.Margin + Add	100.00	Y
00000000	NMCE	GFSL	Var.Margin + Add	100.00	Y

Below the table is a scrollable area with the following columns: Bank, Account No, Account Type.

Bank	Account No	Account Type

Below the scrollable area is a table with the following columns: DpCode, DpId, DpName, Dp A/C No., Active Flag.

DpCode	DpId	DpName	Dp A/C No.	Active Flag

A 'Close' button is located at the bottom right of the window.

**Figure 42: User Profile**

2. User Profile window will get displayed in the screen.
3. Enter the ID of the client or dealer in the field "Client ID".
4. Specify whether user require Client Information or Dealer Information.
5. Click on View button and the details like whether the client is an online client or offline client, Name, Address, E-mail, Phone, Location, Branch Manager, Branch Address, Branch E-mail address, Phone number, Account ID, Venue Code, Company Code, Bank, Account No, Account Type, DP Code, DP ID, DP Name, DP A/C No and Active Flag i.e. Whether the client is active or not, will get displayed in the corresponding fields..
6. Click the close button to close the window.

## 6.9 Customer Care

Customer care support is available for retail investors alone. Dealers can't avail this facility.

## 6.10 Securities

### 6.10.1 SECURITY INFORMATION

The security related information published from the exchange will be displayed. The short cut key for enabling the same is Shift+f7.

**Security Information**

Figure 55:Login History

## 6.17 Clock

This option enables the user to view a portable clock which includes the current exchange time and Date

# 7 WORKSPACE

User can avail the Market Information for the securities from the work spaces. Market Information for the equity market and derivatives market can be viewed from workspace.

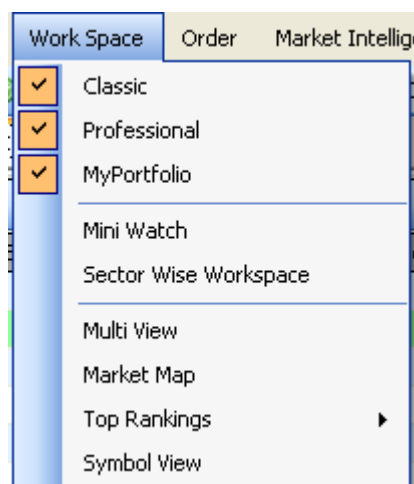

Figure 56: Workspace Menu

## General Instructions

### ADDING SCRIPS

Security selection could be in two ways

- Single Scrip Addition
- Multiple Scrip Addition

#### Single Scrip Addition

For adding a single scrip details in a single entry

1. Click on top right corner  icon or press "Alt+N"(NSE), "Alt+B" (BSE) to enable single scrip addition.

Figure 57: Add Symbols

2. On the "Add Symbol" window enter exchange name and scrip name
3. Press enter key. The scrip will automatically get added to the market watch window.

Symbol	Series	Exg	Exp.Date	Alert	Corp	BBQty	BBPrice	BSPrice	BSQty
20MICRONS	EQ	NSE				325	47.55	48.15	100
3IINFOTECH	EQ	NSE				1631	48.40	48.45	15
3MINDIA	EQ	NSE				5	4020.10	4029.95	1
A22MES	EQ	NSE				65	277.65	277.70	89
AARTIDRU...	EQ	NSE				5	128.30	128.75	125
AARTIIND	EQ	NSE				200	50.80	51.10	434
AARVEEDEN	EQ	NSE				19	53.70	54.95	50

Figure 58: Market Watch

#### Multiple Scrip Addition

For adding multiple scrips details at a single entry

1. Click on top right corner  icon or press "Alt+A" to enable multiple scrip addition. Select the exchange, enter the scrip name and press enter key.
2. Select the scrips you want to add by dragging the mouse or using the up/down arrow key.
3. Click on Add button

The 'Add Instruments' dialog box features a top section with input fields for 'Exchange' (set to NSE), 'Scrip Code', 'Symbol', 'Company Name', and 'Series', along with a 'Search' button. Below this is a large empty table with headers: Exchange, Series, Symbol, ScripCode, Company Name, and Sector Name. A 'Selected Instruments' section contains an 'Add' button and a checkbox for 'Get Market Watch Instruments'. At the bottom, there are 'OK' and 'Cancel' buttons, and a status bar indicating 'Only 300 rows are allowed' and 'Remaining Rows : 300'.

Figure 59: Add Instruments

- 4 Click on OK button in the down grid and added scrips get displayed in workspace.

## DELETE SYMBOL

The option enables the user to delete a particular symbol name from the workspace. User have to select the required symbol name from the workspace and click on right mouse button. Select the option Delete Symbol from the workspace. A message box will appear with a message "Do you want to delete the selected row?". Click on Ok button and the symbol name will get deleted.

This version of the 'Add Instruments' dialog box shows the 'Selected Instruments' table populated with data. The 'Get Market Watch Instruments' checkbox is checked. The status bar shows 'Remaining Rows : 199'.

Exchange	Series	Symbol	Company Name	Sector Name
NSE	EQ	ASHCONIUL	ASHCO NIULAB IND LTD	
NSE	EQ	ASHAPURMIN	ASHAPURA MINECHEM LTD	
NSE	EQ	ASAL	AUTOMOTIVE STAMPINGS & AS	
NSE	EQ	ASAHIINDIA	ASAHI INDIA GLASS LIMITED	
NSE	EQ	ARVIND	ARVIND LIMITED	
NSE	EQ	ARSSINFRA	ARSS INFRA PROJ. LTD	
NSE	EQ	ARSHIYA	ARSHIYA INTERNATIONAL LTD	
NSE	EQ	ARROWTEX	ARROW TEXTILES LIMITED	

Figure 60: Delete Symbols

4. User can select or remove from either fields by selecting the item and clicking on right arrow/left arrow icons.
5. After selecting columns click on Ok to complete the process.
6. If user wants to set the default column settings after changes click on Restore Default.

## SYMBOL POPUP

Symbol popup option facilitates the user to view market details as popup message.

1. Select popup option by clicking on right icon  and Click on the desired scrip name

ABGSHIP		Venue - BSE

Figure 63 : Popup

A popup window displaying market details like Best buy price, Best Sell Price, Day High, Day Low, Total Buy Quantity, Total Sell Quantity, Total Traded Value, Total Trade Quantity, Last Traded Time and Company Name will get displayed.

## ALERT SETTINGS

Clients are having provision for setting alerts. Alerts are to be based on fields: LT Price, BB Price, BS Price; Condition: Equal To, Greater Than, Less Than; set the value and date and then save the settings.

1. Select alert settings by clicking on icon .

The 'Set Alert' dialog box is shown with the following details:

- Symbol Name :-** GOLDM
- ☒ **Enable Alert**
- Good till date**: 16-Jun-2011
- Field**: LT Price
- Condition**: equal to
- Value**: 0.00
- Buttons**: Save, Cancel

Figure 64 : Set Alert

2. Click on enable alert.
3. Select the option from fields list
4. Select the condition and enter the value.
5. Click on save button to save the alert settings
- 6.

## FREEZE COLUMN

The option enables the user to freeze a particular column in the workspace.

## DEFAULT FREEZE

The option enables the user to freeze the very first column (Symbol Name).

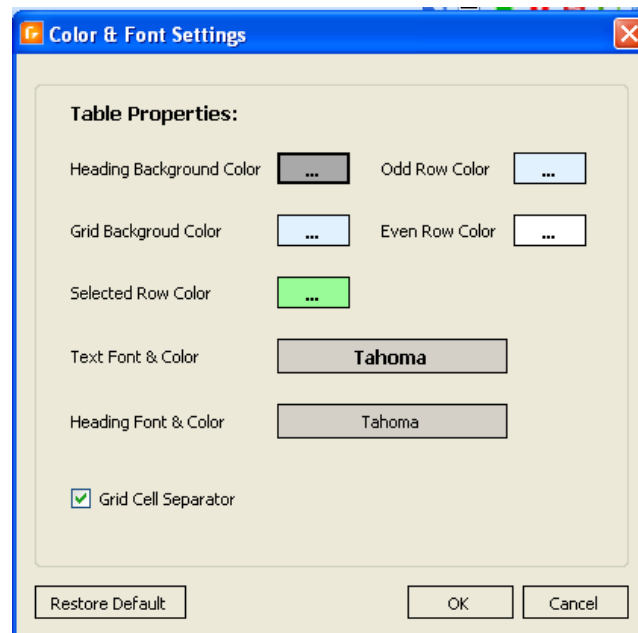

## COLOR & FONT SETTINGS

Color settings option facilitates the user to set the color as he/she wish.

1. Select color settings by clicking on icon .
2. To change the Heading color select heading color option.
3. Select the desired color from the color chooser window.
4. Click OK button

Similarly user can set color for Grid Background, Even Row and Odd Row.

1. To change the Text Font or Heading Font click on Text Font.
2. Select the desired font from font chooser window.
3. Click OK button.
4. To change the text Font click on Text Font.
5. Select the desired font from font chooser window.
6. Click on OK button.
7. To hide the Grid form workspace uncheck the option Grid Cell Separator.
8. To restore the default settings click on Restore default setting button.
9. After changing the desired settings click on OK button.

**Figure 65: Colour and Font Settings**

## MARKET DATA GRAPH

Market Data Graph enables the user to view the graphical representation of market data for particular scrip.

Figure 66: Market Data Graph

- To view the Market Data Graph double-click on the desired scrip.

## INDEX VIEW

Index view enables the user to view the index details of that day.

- Select the desired exchange NSE/BSE.

Indices	Index	Net Chg
S&P CNX NIFTY	5475.05	-25.45
CNX NIFTY JUNI	11289.55	-46.75
S&P CNX DEFTY	4244.10	-13.80

Figure 73: Sector Wise Workspace

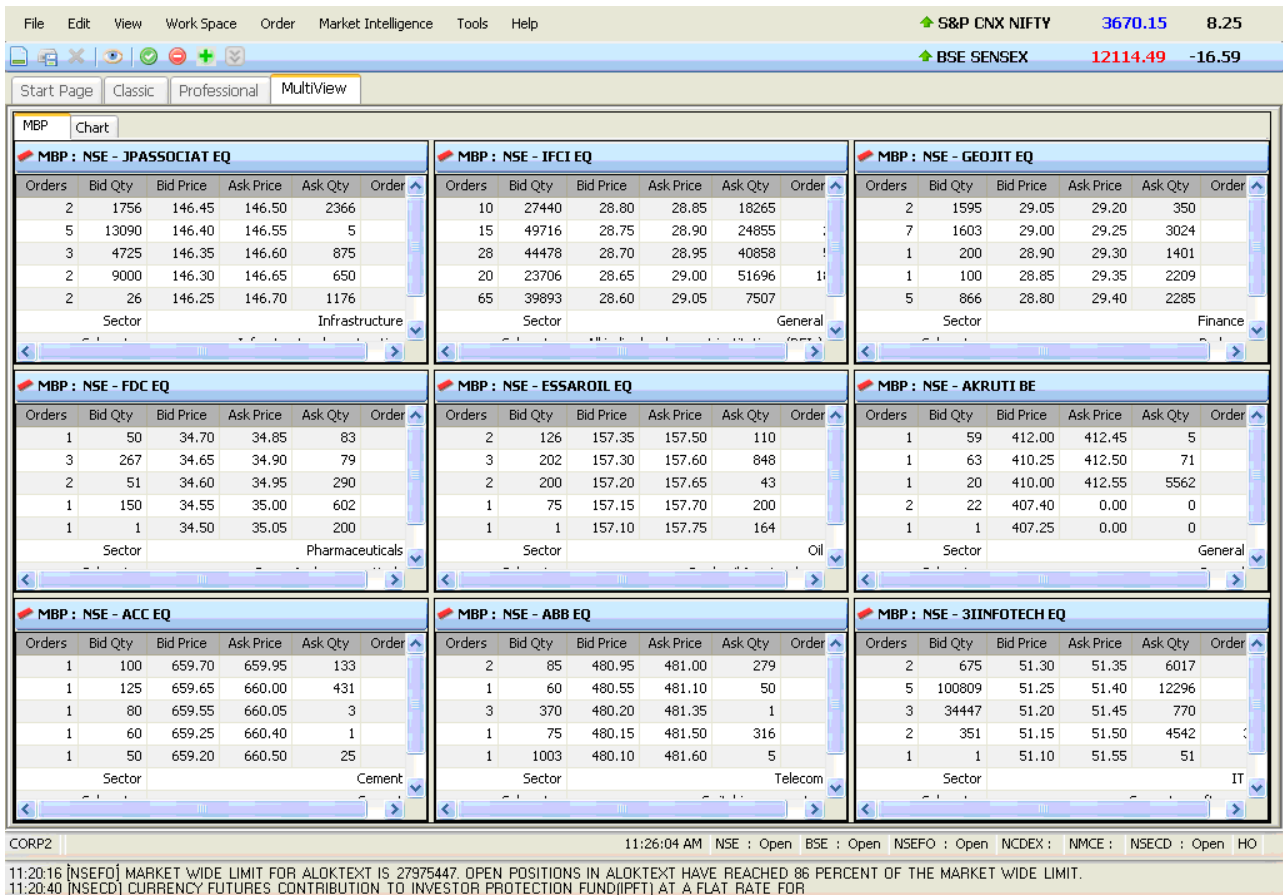

Sector Wise Workspace enables the user to perform

- Adding Scrips
- Column Settings
- Color Settings

## 7.6 Multi View

Multi view facilitates the display of multiple MBP of different symbols or multiple charts of different symbols in a single window.

1. To add scrips in multi view click on  icon
2. Select the venue & scrip from the selection list.
3. Press Enter key

### Figure 74: Multi View

## 7.7 Top Ranking

Top Ranking provides user with details like trading day Gainer, Loser, Most Active, Most Active (by traded value) and Most Active (by traded quantity).

### 7.7.1 TOP RANKING NSE

### Steps to be followed

- Select the option Top Ranking from the workspace
- Select NSE Top ranking
- Top Ranking NSE will get displayed in the window.

### Steps to be followed

- Select the option Top Ranking from the workspace
- Select BSE Top ranking
- Top Ranking BSE will get displayed in the window.

### Steps to be followed

- Select the option Top Ranking from the workspace
- Select NSEFO >> FUTSTK Top ranking
- Top Ranking FUTSTK will get displayed in the window.

## 9.11 Resistance and Support

Support and resistance are by far the most important day trading technical analysis elements you will ever find, and the best day trading option if you want to be on the right side of the market. Support is a price level at which a stock or other security stops falling (at least temporarily) hence the name. Resistance is a level at which price stops rising, at least temporarily.

1. Select Market Intelligence >> Resistance and Support Level.
2. Select exchange. Enter the security full name or any letter of the security name.
3. click on view

Exchange	Symbol	View
NSE		

Symbol	Series Company	Close Price	Pivot Point	First Support	Second Support	First Resistance	Second resistance
--------	----------------	-------------	-------------	---------------	----------------	------------------	-------------------

Figure 113: Resistance and Support

## 10 TOOLS MENU

Tools menu deals with functions like Settings and Shortcut key setup.

### 10.1 Settings

The settings menu deals with general settings of INET. By clicking on the Settings button in the tool menu, a window with settings details will get displayed.

#### 10.1.1 CONFIGURATION

By clicking on the configuration link in the settings, user could view details like Connection type, Connection protocol, Market Data Server, Transaction Server and URL.

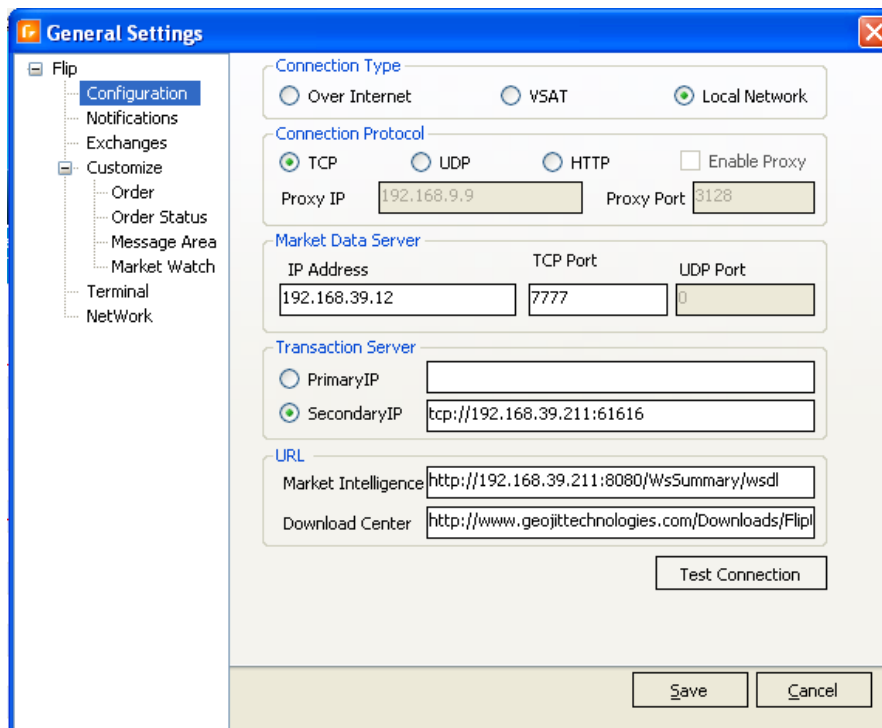

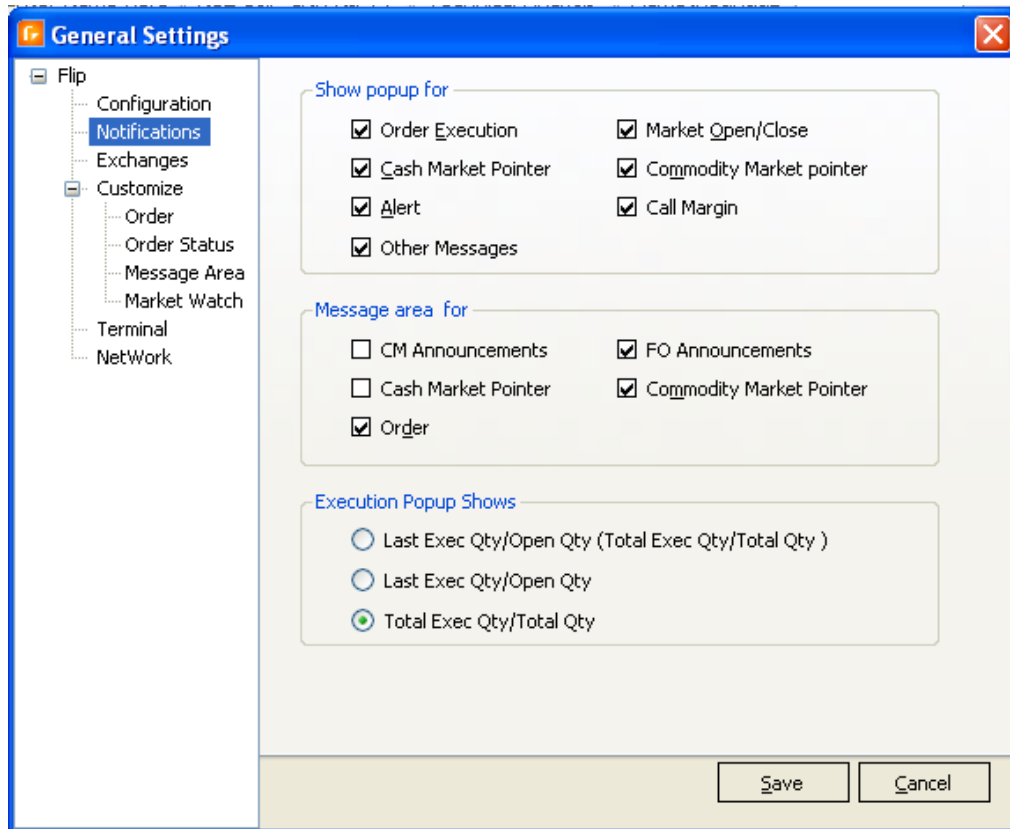

Figure 114: Configuration Settings

- The connection type specifies how the connection been done, which can be "Over the Internet", "VSAT" or "Local Network".
- The connection Protocol specifies the protocol used for the connection. For Connection Type "Over the Internet" the connection protocol used must be "HTTP".
- Proxy is a filtering part. By clicking the "Enable proxy" icon, proxy will get enabled and "Proxy IP" and "Proxy port" also will get enabled.
- The configuration settings include details about Market data server like "IP Address" and "Port Number".
- Transaction details include "IP Address" in it. Two options are there in Transaction IP, which are Primary IP and Secondary IP. User can either enable Primary IP or can enable Secondary IP.
- URL consists of details like "Market Intelligence" and "Download center".
- In order to get a test connection click on "Test Connection" button. If the entered data's are correct then system will get connected successfully.
- To save the entered details click on the "Save" button and to "Clear" the entered details click on "Cancel" button.

### 10.1.2 NOTIFICATION

Notification can be set in two modes i.e., either by showing "POP UP message" or by "specifying message area".

**Figure 115: Notification Settings**

- There exist various options like Order Execution, Cash Market Pointer, Market open/close, Commodity Market Pointer, Alert, Call Margin and Other Messages in "Show popup for". By enabling any of the options specified above corresponding details will be shown as popup.
- As the term implies "Message area for" is the area specified for the purpose of displaying CM Announcements, Cash Market Pointer, Order, FO Announcements and Commodity market pointer. By enabling any of the specified options, those details will be shown in the "Message area for"
- "Save" and "Cancel" button are for the purpose of saving the settings and canceling the settings.

### 10.1.3 EXCHANGES

The details about the various exchange details are listed in this menu.

- In India the active venues are NSE, BSE, NSEFO, NCDEX, NMCE, NSECD, NSEMF, MCXSX, MCX AND BSEFO. At present BSEFO is not active but in near future that will be activated.
- Tadawul is the active venue at Saudi Arabia whereas in Oman the active venue is MSM.
- "Save" and "Cancel" button are for the purpose of saving the settings and canceling the settings.
- It also includes option to chose the color in which the scrip should display in Market watch based on exchange. Also differernt colors can be selected for Trade to Trade segments

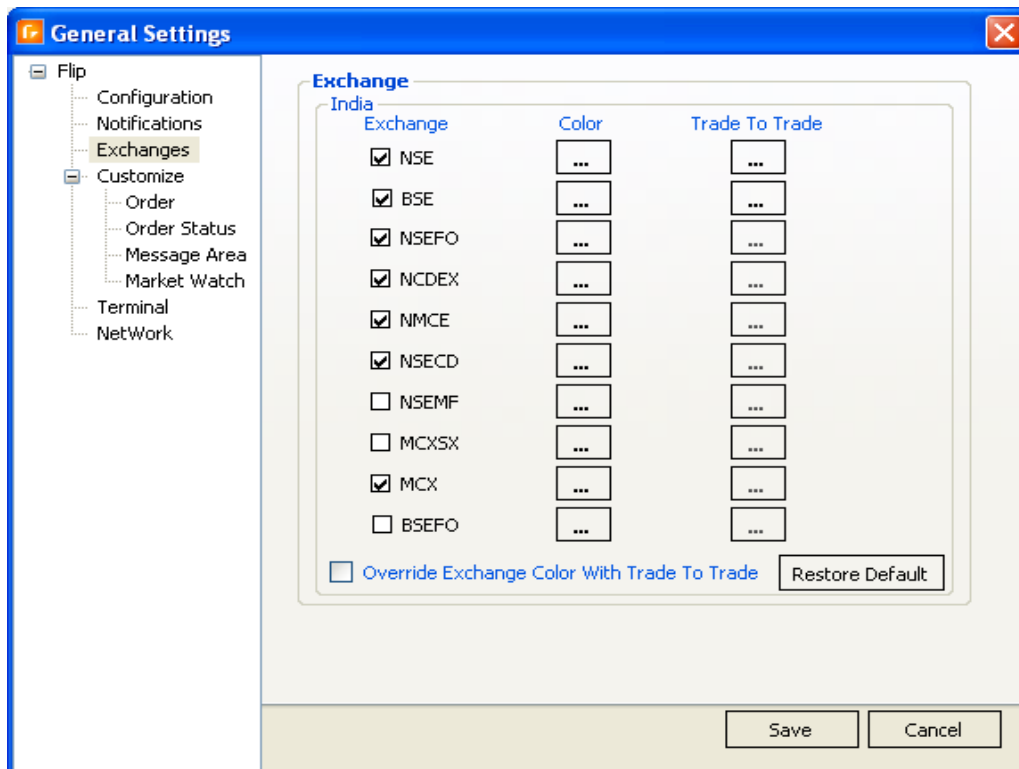

Figure 116: Exchange Window

#### 10.1.4 CUSTOMIZE ORDER

This menu deals with customizing the orders. It include various divisions for customizing orders like Confirmation, Change order screen, Show all trades in, Pooling and Default Order Location.

- Confirmation: By Ticking the Order Confirmation, Online confirmation & Cancel Confirmation, A message box asking for conformation will get displayed before submitting the order or before canceling the order. Also it includes the option to disable Offline.
- Change Order Screen: By selecting the option "convert 0.00 Price limit at Market Order" The order placed with Price as 0.00 in Limit order will get converted to market Order automatically. Also it includes option to change the focus in product type on selection change.
- In the change order screen FO part, We have option to disable or enable qty or lot also have the option to change the focus to qty or lot in the order screen.
- By clicking on the "Order Pooling" Option in the "pooling", Order pooling can be enabled. Pool size also can be set in prior by entering the required pool size in the corresponding field.
- The option to Retain Order details has to be specified if needed. By enabling the option retain order details the order details such as Client Code, Symbol name, Quantity and Price while placing order can be retained and the details will get generated automatically while placing order.
- Option to show all trades in intraday position and trade by trade information in trade summary exist for dealers alone.
- By setting the correct Order Location in the "Default Order Location" field, the client code will automatically generate that preset client code in the corresponding field. Thus client have to enter the remaining part alone.
